PROFILE

My name is Kenath Liyanage, and I am a certified web developer specializing in frontend development. I completed my degree at Jensens Yrkeshögskola in Stockholm and have a strong passion for creating modern, user-friendly web experiences.

I am currently seeking a role as a junior developer and have experience working in IT companies where I have developed and strengthened my skills.

EXPERIENCE

Fullstack Engineer, Coverge Oct 2025 — Current

I work as a Fullstack Developer at a startup named Coverge, where I develop core features using Next.js, Tailwind, Python, and PostgreSQL. I also contribute to Supabase integration, CI/CD workflows, and product design for a scalable and testable MVP.

Fullstack Developer, Regent AB Nov 2024 — May 2025

Responsible for fullstack development of a mock data application within a team of developers. The work included frontend development (React/JS), backend (Node.js/MySQL), UI design (Figma/Photoshop), and testing (Cypress). The goal was to build a scalable and reusable platform for developers and testers to simulate API responses.

Virtual Reality Developer, Alloverse Feb 2023 — Apr 2023

This was my first internship, where I learned to create a Virtual Reality 3D sandbox application. I used the terminal to write code and was responsible for the functional aspects of the logic as well as the 3D modeling, where I created models and textures. Unfortunately, the company went bankrupt shortly after I completed my internship there.

SKILLS

Frontend:

Javascript UI
TypeScript Design
React ThreeJS
Next.js XR
HTML/CSS
Storybook
Figma
Storybook

Backend:

Database MongoDB
PostgreSQL Python
MySQL C#
WireMock
REST API
Node.js
Open Source
Supabase

Testing/QA:

Cypress
Integration Testing

Tools / DevOps:

Git
GitHub
Vercel
Railway
CI/CD
Azure

EDUCATION

Aug 2023 — Jun 2025

Frontend Developer, Jensens Yrkeshögskola

Aug 2021 — Jun 2023

Virtual Reality Developer, Yrkeshögskola, Nackademin
